DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-6 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,452,553 to Clapp et al.

Regarding claims 1-6, Clapp discloses a waterproof (Col. 2, lines 65-66), cost effective, passive roofing cover apparatus that can be mounted on existing dwellings and structures and is installed to float over the roof creating an air gap

Art Unit: 3635

between the cover surface and the roof (Col. 3, lines 30-33 and figs. 9 & 10).

Where the cover is designed with excess material to allow for dimensional changes that may occur in the winter and summer months so that the surface area of the roof covered shall be continuously adjustable allowing a fine control over solar heat energy adsorbed by the roof (Col. 3, lines 33-38).
